Attention:

Survey Methodologists –

Career Opportunity at BRFSS

>Love to optimize **survey content for best results?**

>Appreciate highly collaborative **work environments?**
>Like professional challenges, **such as championing technical projects from the concept stage, through the builds and approvals and into implementation?**

We knew it! Let's connect.

The Centers for Disease Control and Prevention, Division of Population Health (DPH), Population Health Surveillance Branch is looking for a dynamic and strategic GS 12/13 Survey Statistician (Survey Methodologist). The incumbent will work with a team on research and development efforts to enhance the nationwide, State-based Behavioral Risk Factor Surveillance System (BRFSS) with respect to information management, data quality, questionnaire development, data processing, and weighting. The incumbent will work with the team on methodological research to improve survey planning, data collection, data management, and analysis of BRFSS data.

If you are interested, please contact BRFSS Branch Chief Dr. Machell Town at mpt2@cdc.gov, 770-488-4681 or mtown825@yahoo.com (only while at JSM).

The **Behavioral Risk Factor Surveillance System** is a top source of States, DC and US Territories data on health-related behaviors, chronic illnesses, use of preventive health services, and emerging issues. For more information about BRFSS, please see the program's website at www.cdc.gov/brfss.
